# Sizing Chart

- Pipes of nominal diameter up to and including 80mm have no pipe stiffness requirement – they’re specified solely on materials and dimensions.
- Pipes 100mm+ are specified by minimum stiffness.

## SIZING TIP

Sometimes there’s confusion around actual pipe diameters compared to their ‘so-called’ size. So we’ve laid out all the specs side by side, so you can see exactly what you’re getting.

## PLAIN WALL PIPE DIMENSIONS AS/NZS 1260
